01.

WHY

Why are we passionate about this?

/ / / / / / / / / / /

PROBLEM VS. SOLUTION

PROBLEM

Individuals that communicating in sign languages such as ASL and ISL etc have a barrier for communicating with others in real life as well as over digital platform, especially in the work force.

This also raises the need to have a sign language interpreter for making an environment accessible for people with the need.

SOLUTION

ARTIFICIAL INTELLIGENCE (AI)

/[AI]

02.

HOW

What's the plan?

OUR PRODUCT

Our product recognizes ASL hand symbols and transcribes them into text, enabling interviewers and prospective interns to enjoy a more inclusive and accessible experience. It can be integrated as a feature within a web application, similar to our integration with the Access Communication homepage, or used as a standalone app for real-time conversations.

03.

LOOKING TO THE
FUTURE...

NEXT STEPS

PLAN 1

Teach the AI model other sign languages, so a diverse group of people can be catered to.

> > > >

PLAN 2

Create as an application to use with other software (Zoom, Google Meet...)

>
>
>
>

PLAN 4

Have a feature where text to ASL is also possible (for 2 way communication)

< < < <

PLAN 3

Feature to have ASL to speech and speech to ASL

IVY

THEM

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than the Moon

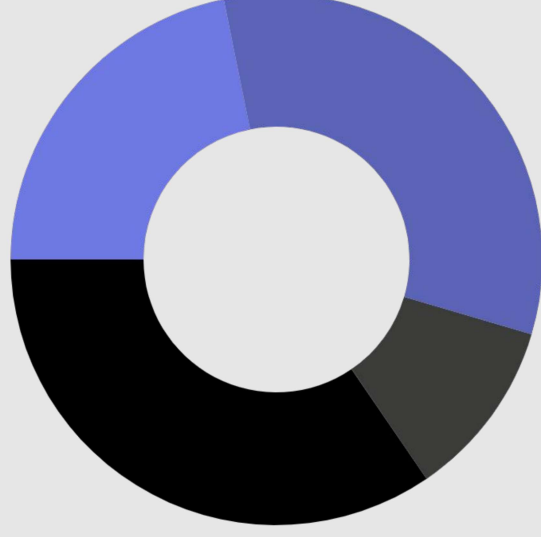

US

Venus has a beautiful name and is the second planet from the Sun. It's hot and has a poisonous atmosphere

MARKET SHARE

	24%	Mercury is the closest planet to the Sun
	36%	Venus is the second planet from the Sun
	12%	Mars is actually a very cold place
	38%	Jupiter is the biggest planet of them all

MERCURY

It's the closest planet to the Sun and the smallest one in the Solar System. This planet's name has nothing to do with the liquid metal, since Mercury was named after the Roman messenger god
